

Company presentation

Engrenages HPC is a company specialised in the sale of mechanical components and other industrial supplies. Established in France in 1991 and now with over 35,000 references in its catalogue, HPC is capable of meeting the needs of all of its customers regardless of their field of activity.

Known originally for its range of gearboxes and other speed reducers, the company has built up its reputation by constantly widening the range of the products distributed through its website and infamous small catalogues. Today, the catalogue consists of 5 distinct volumes:

- Mechanical elements
- Power transmission
- Linear guidance
- Precision gears and sprockets
- Conveyers and housing

In addition to a wide range of standard parts, HPC is also capable of sourcing almost any mechanical component. This is possible thanks to its close relationship with an extensive network of suppliers that has been built up over the 25 years the company has existed.

HPC's technical team are there to reply to customer requests for modifying standard components, manufacturing parts to order or finding non standard items from other sources. Always at the front of technology, HPC now offers a new 3D printing service. Whatever the customer's requirement, HPC will find a 3D printing solution.

Today HPC's offer to its customers is:

- A dynamic website www.hpceurope.com
- An online shop with real-time stock levels
- Free download of 3D CAD files
- Technical information for all products downloadable in PDF format
- Free technical support from a fully trained team of technicians
- A full catalogue comprising 5 volumes of standard products and one explaining HPC's "Made to Measure" services.
