

Linear guide system **Drylin® W**

WJRM

Hybrid bearings

- Drylin W hybrid bearings offer a unique combination of sliding and rolling movement. Depending on the mounting arrangement used, the use of maintenance free rollers reduce the driving force required. Any shear forces or shock forces are absorbed by the bearing. This hybrid bearing is ideally suited for manual adjustments especially in the applications such as door adjustments.
- Low driving force required, coefficient of friction 0.04 to 0.05 μ
- Highly cost effective solution
- Can be used with any of 7 profiles rails such as WS10, WS16 and WS20

Applications

- Adjustable doors, machine guards, simple handling systems, furniture
