# *Lock pin for clamping*

GAR Introduction

*The **locking pins** are ergonomic items designed
for the quick clamping of 2 plates.
The system can be used for tool changing devices
in the assembly area or for other manual movements,
such as conversion to automatic installations.
The **GAR-BAB** are lock pins based on the principle of a ball
lock pin, offering excellent grip and easy handling.
The **GAR-QT** are based on a quarter turn lock,
with an On/Off indication.
Although the model **GAR-DLL** can be used without
the mounting sleeves, they still allow optimum use
of the lock pins.*

Press

Push
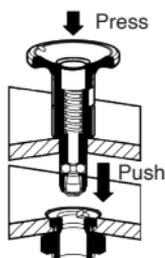

Button pressed, insert the
locking pin into the fixing
sleeve

Tight
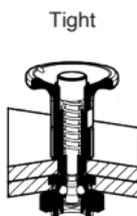

Release the button to clamp
the plates
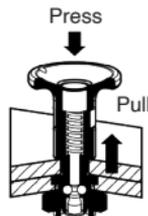

Press

Pull

To remove, button pressed,
pull the locking pin out
of the fixing sleeve.

**Use without fixing sleeve
