Performance characteristics

LVT4-12

LVT4-48

LVT4-108

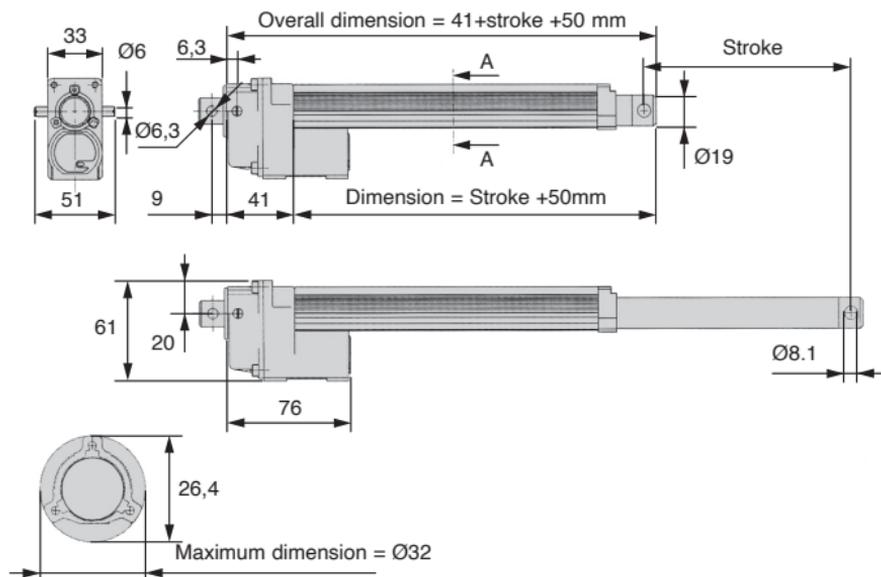

4A Operating cycle (14V): 20% On 80% Off

There is only a 12Vdc version available

Note:

- Optimum power is obtained at 50% of max current (see light area on graph)
- Max operating temperature: 70°C
- Over-temperature protection available on request

Attention: The above tables refer to a 3mm pitch actuator. For an actuator with a 10mm pitch, just divide the load by 10/3 and multiply the speeds by 10/3 (same principle for 3.5mm pitch, use a factor of 3.5/3)
