

PERIFLEX® elastic coupling

PNA

Replacement tyre

- Tyre for PERIFLEX® coupling

- Replace the tyre without dismantling the machine
- Material natural rubber Tyre R (NR) equipped with disposed material in R
- Quality tyre X(1) with inserts mounted in X pattern

Assembly

- The elastic coupling is delivered pre-assembled. To mount the coupling, remove the tyre and place the hubs and locking assemblies on their respective shafts. Bring the two assemblies together respecting the distance "O" and aligning the two hubs with a straight edge or template.
- Place the tyre between the two hubs ensuring there is minimum radial backlash (2-15mm depending on the size of the coupling). Then bring the two locking assemblies together, tightening pairs of diametrically opposite screws to the prescribed torque. As the rubber may decompress with time, re-check the torque after a few hours.

SAVE MONEY !
Only change the tyre
