

Rotating lifting ring

VLBG RUD®

Base rotates through 360°

- Bolt on arched lifting ring, wider opening
- Rotates through 360° for easy alignment to lifting direction
- Clamping spring holds the suspension ring in the requested position and reduces noise
- Surface finish: Pink thermochromic coating offers high wear/corrosion resistance
- Operating instructions: see next page

Option

- Can be supplied with a longer thread and a mounting screw for use with a through hole or for mounting on lighter metals such as aluminium

4 Suitable for lifting in any direction
Factor of safety = 4

Info.

- Conforms to machine Directive 2006/42/CE

Rotating lifting ring

Base rotates through 360°

 **RUD® VLBG**

Not allowed!

Not allowed!

- The ring, thread and nut are all certified and are 100% tested for cracks
- Metric versions have a **universal hexagonal** (external and internal) head that allows use of common tools.
- **Multiple surface coatings for increased protection:** the special CORRUD-DT (RUD patent) pre-coat guarantees **anti corrosion protection 20 times higher** than galvanising.
*except for the cut surface of any shortened threads
- Screwed part "H" is threaded along entire length
- Ensure that the mating surface (R) is truly flat. When fully tightened, the ring must be able to rotate through 360°.
- The lifting ring should be aligned in the direction of lift and be able to move freely. It should not be any edge as a support.
Do not rotate the ring whilst under load.
- Only for use by trained personnel and strictly in accordance with local lifting safety regulations.

Why are RUD lifting rings “pink”?

Some RUD lifting rings have a patented pink finish. This vibrant fluorescent coating is heat sensitive and will change colour as the temperature rises.

Initially pink, as the temperature increases the colour will change to beige, then brown and finally black.

If the ring is black and there are blisters, a temperature of 400°C has been exceeded. This implies a reduction in the carrying capacity and maximum working temperature.

Pink epoxy finish
